## BRAKES FOR KIDS

St. Jude patient **Maelin-Kate**, diagnosed with anemia.

Together We Can  
Make a Difference...  
for the Rest of a Child's Life!

# BRAKES FOR KIDS

Dear Neighbor,

From March 1, 2024, through March 31, 2024, get FREE brake pads or shoes with any brake repair. Even better, 10% of the brake repair costs are donated to benefit St. Jude Children's Research Hospital®.

St. Jude Children's Research Hospital is leading the way the world understands, treats, and defeats childhood cancer and other life-threatening diseases. And families never receive a bill from St. Jude for treatment, travel, housing or food—so they can focus on helping their child live. Their mission is clear: Finding cures. Saving children.® Consistent with the vision of founder Danny Thomas, no child is denied treatment based on race, religion, or a family's ability to pay.

So, call or stop in today to schedule a FREE brake inspection. If you should need brakes, not only will you save a lot of money, you'll be helping children and families in need.

I look forward to seeing you soon,

*Ted Heitbrink*

Ted Heitbrink,  
Owner, Chickasaw Garage

## MANAGER'S MINUTE

March is quite the busy month this year, and to kick things off, I would like to wish my beautiful wife, Stacey, a Happy Anniversary!!

St. Henry is hosting their annual St. Patrick's Day Celebration again this year, and I know my kids look forward to heading uptown each year to enjoy the festivities. During the parade, the Party with a Purpose Committee will be revealing the golf cart that will be raffled off at their annual benefit in August. Following the parade, the Committee will be starting to sell golf cart tickets earlier than previous years, so don't forget to grab your tickets for a chance to win!

This is the last month of our Brakes for Kids promotion. If you have been putting off some brake work, you do not want to miss out on this chance to receive free brake shoes/pads! At the end of the month, we will be closing at noon on March 29th and also be closed on the 30th as well for the Easter holiday. With all that being said, I would like to wish everyone a Happy Easter!

Sincerely,  
**Ted Heitbrink**

## 5 FEATURES YOU DIDN'T KNOW YOUR CAR HAD

- 1. GAS TANK SIDE INDICATOR.** In many cars, there's a little arrow next to the gas symbol on your fuel gauge that points to the side of the car that should be facing the pump. This tiny, easy-to-miss feature can save you a whole lot of awkwardness pulling a rental car into the gas station.
- 2. TIRE PRESSURE MONITOR.** A dash light that looks like a yellow exclamation point in the middle of what looks like two parentheses with a dotted line below. It's supposed to look like a cross section of a tire, and that light tells you that your tire pressure is low. If you're seeing it, either check your tire pressure or head to your favorite repair shop — many of them will check for free.
- 3. STABILITY CONTROL.** Do you sometimes see a dash light that looks like a car with wiggly lines underneath it? That means you have an electronic stability control (ESC) system. It closely monitors your steering to determine when your car might be out of control, and softly adjusts the brakes on each wheel to compensate for over- or understeering and to prevent rollovers.
- 4. BACKUP MECHANICAL KEYS.** Key fobs have become the standard way to unlock vehicles, which is convenient until your key battery dies or you have some other kind of tech malfunction. Many key fobs have little mechanical keys hidden inside that you can usually release by pressing or sliding a small button, although you may have to check the owner's manual to figure it out.
- 5. BLIND SPOT MONITORING.** The rear sides of your car are called "blind spots" for a reason—they're really hard to see, and even if you dutifully check them before changing lanes, accidents can happen. Some newer cars (and some not-so-new luxury vehicles) come with blind spot monitors that let you know when a car's occupying this sneaky spot next to you. Some of these monitors are more obvious than others. It could be lights on your side mirrors, dashboard, or the pillar between your driver's side window and your windshield. A few cars even have audible warnings if your turn signal is on but the lane next to you is occupied.
