JAKE'S AUTO & TRUCK REPAIR

Friendliest Little Repair Shop in Draper

# WINTER SPECIAL $199

Cold weather is tough on vehicles. Our technicians check the systems that matter most for safe winter driving, so you know exactly where your vehicle stands before the snow hits.

### 4-Wheel Brake Inspection
We remove all four wheels to measure inner and outer brake pads, check rotors and brake hoses, and test your parking brake.

### Battery & Charging System
We test your battery's overall health and the alternator's performance, and inspect the terminals for corrosion and the cables for tightness.

### Tires & Tire Pressure
We inspect every tire for wear or damage and check the pressure in all of them, including the spare.

### Alignment Check
A quick alignment check to catch anything out of spec before it causes uneven tire wear, pulling, or handling problems.

### Steering & Suspension
We look over your steering and suspension parts for any wear, looseness, or leaks that could affect handling on slick winter roads.

### Belts & Hoses
Every drive belt and hose is checked for cracks, dryness, soft spots, or leaks that could leave you stranded in the cold.

### HVAC & Defrost
We test your heating, A/C, and defrost systems on every vent setting, check vent temperatures, and inspect your cabin air filter.

### Lights & Horn
Headlights (high and low), turn signals, brake, reverse, fog, marker, plate lights, and flashers, plus your horn.

### Engine Air Filter & Wiper Blades
We check your air filter and test your wipers with washer spray for streaking, chattering, or worn blades.

### Coolant & Washer Freeze Protection
We test your coolant and washer fluid with a refractometer to make sure they're protected in the coldest winter temperatures.

### Fluid Check
Engine oil, transmission, power steering, brake, coolant, and washer fluids.

*Where accessible; excludes differential and gearbox.*

### See What We See
We document your inspection with photos and videos, so you can see your vehicle's condition for yourself.
